

DUAL AIR CHAMBER TECHNOLOGY

2X TRACTION
& PROTECTION

MASSIVE TRACTION GAINS • NO PINCH FLATS • 100PSI RIM PROTECTION • LIGHTER & LASTS LONGER THAN HD TUBES

REVOLUTIONARY DUAL AIR CHAMBER TECHNOLOGY

2X PROTECTION

NO PINCH FLATS | 100PSI RIM PROTECTION | 2 MINUTE TIRE REPAIRS

2X PERFORMANCE

MASSIVE TRACTION GAINS | PLUSHER RIDE | LBS LIGHTER

UNSTOPPABLE PERFORMANCE

TUbliss ELIMINATES tubes allowing the use of standard tire REPAIR plugs to make trailside repairs in seconds. Tire sealants also work much better in the tire due to THE TIRES thicker reinforced carcass. Additionally TUbliss provides a low speed run-flat ability in the event of major tire damage.

STANDARD TUBELESS
TIRE PLUG KIT

HOW IT WORKS

WORKS WITH STOCK RIMS AND TIRES

(Tubliss seals to the inside of the tire, NOT the rim. So it works with bent, tweaked and dinged rims too.)

+ INSTANT MASSIVE TRACTION GAINS

Now you can safely run lower tire pressures for instant traction gains & much plusher ride

+ SUPERIOR RIM PROTECTION

Ultra high 100PSI protection at the rim where you need it & eliminates pinch flats too

+ POUNDS LIGHTER & LASTS LONGER

Tubliss is pounds lighter & lasts much longer than pinch prone UHD inner tubes

OFF-ROAD & MOTO CRITICS AGREE

Every so often new technology leads to major advancements in motorcycle performance. TUBLISS has made this leap in tire performance with the revolutionary DUAL CHAMBER SYSTEM. Now you can safely run much lower tire pressures for huge gains in traction, handling and protection. All this adds up to better results on race day and more fun every Sunday.

"If we could give it six stars we would."
